

June 16, 1950.

Dr. Evelyn M. Witkin,
Department of Genetics,
Carnegie Institution of Washington,
Cold Spring Harbor, L.I., N.Y.

Dear Evelyn:

I was glad to hear that the new transfers were satisfactory. You can probably tear up the letter that Zinder wrote concerning the unsuitability of M-9.

Esther and I are leaving in few days for a trip to the West Coast - I will be giving a course (regular lectures -- not lab) at Berkeley, in the Department of Bacteriology. However, we are not due to arrive until about August 1. There is quite a flurry of courses, isn't there?

Yours sincerely,

Joshua Lederberg

P.S. I will be glad to hear from you how the course goes, and who will be taking it.
